About COCcloud

COCLOUD Has All the Cloud Services You Need

7+ Major
Cloud Providers

Partnering with 7 major cloud providers,
COCLOUD helps businesses swiftly integrate
traditional on-premise data into the cloud.

ABOUT COCloud

**"A comprehensive cloud integration expert,
empowering businesses to accelerate innovation and
growth."**

COCloud provides end-to-end cloud solutions for businesses of all sizes, representing nine leading global cloud brands.

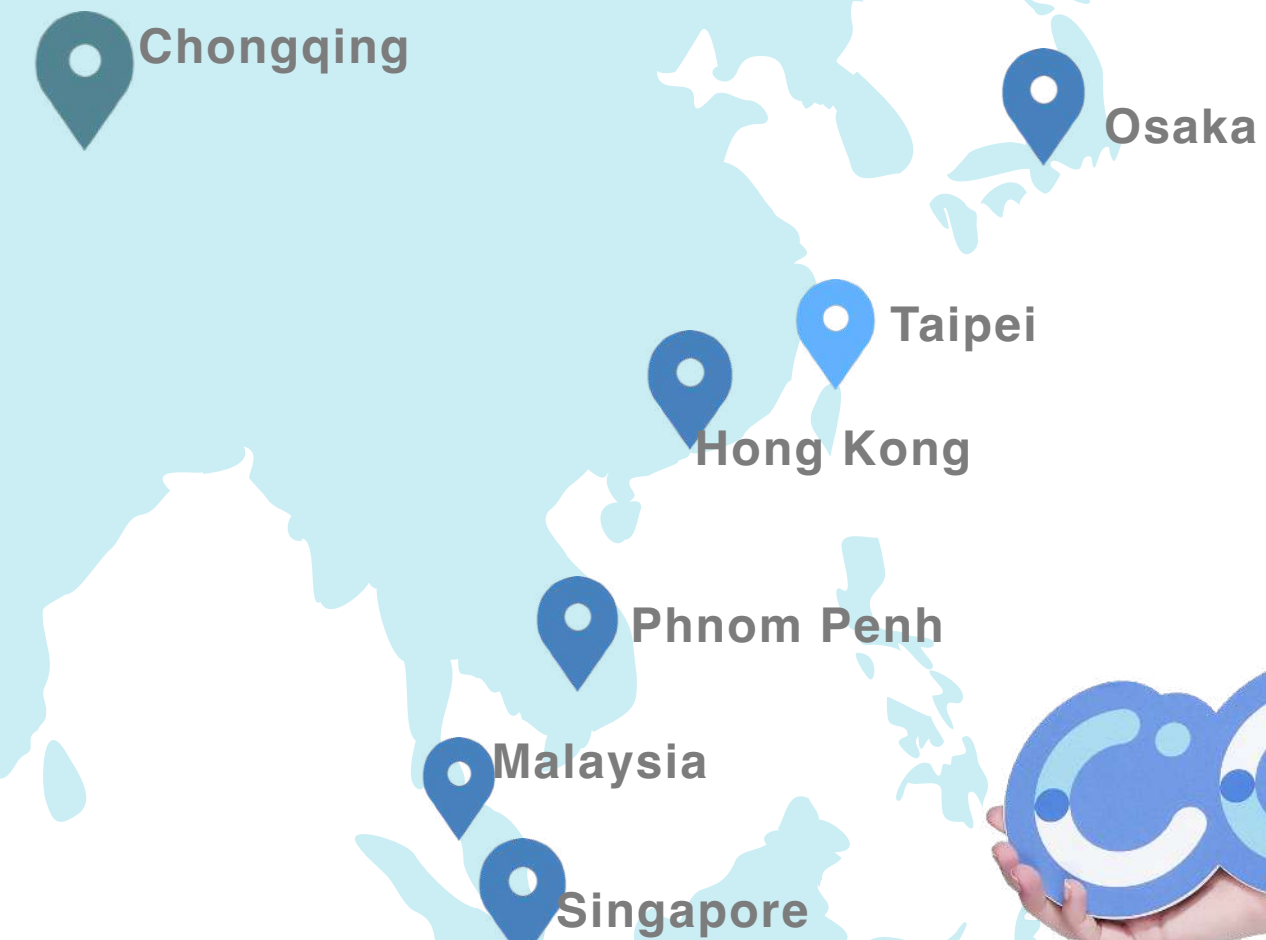

We have delivered cloud services to hundreds of companies, helping clients achieve business goals, drive innovation, and stay agile in a rapidly changing global market.

Most Locations in the Industry

COCLOUD's services are available globally, and you can find COCLOUD in these seven cities.

-  Operational Bases
-  Operations
-  Development

Service Scope

COCLOUD has all the cloud solutions you need.

Cloud Server

COCLOUD offers easy cloud adoption with comprehensive storage, computing services, and end-to-end cloud solutions via leading public cloud partners.

Cloud Storage

Unlimited Capacity,
Stable and Reliable

Our cloud storage provides unlimited, secure, fast, and easy backups for diverse business data with cross-platform and cost-effective support.

CDN

Use more, save more.

The Ultimate Accelerator for
Media Delivery

Our CDN services optimize network performance through hybrid deployment, accelerating video streaming and large file transfers.

DDoS Protection

Preferred Protection for
Gaming and E-Commerce

We offer DDoS protection tailored for high-traffic industries such as gaming and e-commerce, effectively blocking attacks and ensuring 24/7 website stability.

WAF

The Security Guardian for
Web&API

Our WAF is designed to protect web applications and APIs from cyber threats, ensuring website security and availability against common attacks.

Global SMS

Prime Choice for
Cross-Border E-Commerce

Our global SMS service covers over 100+ regions, supports multiple languages, and enables effortless reach to worldwide mobile users.

Exclusive Solutions

Indonesia

India

Vietnam

Japan

Australia

Brazil

Thailand

Canada

South Korea

Bangladesh

COFlyer SMS / OTP in 100⁺ Countries

100⁺ Global Compliance

Possessing a valid telecom license, facilitating swift delivery to local operators across more than 100 countries or regions.

Easy Access

Unified global API, easily integrated into systems and business processes, enabling access through standard protocols.

High Volume/ Stability

Leveraging a distributed architecture for stable, high-capacity operation, supporting concurrency, and delivering up to 5 billion messages monthly.

Secure / Reliable

The platform provides HTTPS/SSL encryption, auto disaster recovery, redundant backups, and data anonymization.

Cloud Service Solutions

COCLOUD Service Industry

Not only these, but our services extend across various industries any industry can become our partner!

**COCloud offers One-Stop Cloud Solutions
For All Your Business Needs**

Amazon Web Services (AWS)

Official Partner

Amazon Web Services (AWS) is the world's most comprehensive and widely adopted cloud platform, offering over 200 fully featured services. It helps leading government organizations, the largest enterprises, and the fastest-growing startups cut costs and boost innovation.

Amazon Bedrock

Gen AI

Amazon Bedrock offers quick access to top FMs for generative AI from leading providers.

Amazon S3

Storage

Amazon S3 provides scalable, highly available, secure, and high-performance object storage.

Amazon EC2

Compute

EC2 offers the broadest and deepest compute platform, with over 750 instances.

AWS Lambda

Compute

AWS Lambda enables you to focus solely on your code, eliminating the need to manage servers.

Amazon CloudFront

CDN

Securely deliver content with low latency and high transfer speeds.

Amazon RDS

Database

Amazon RDS is a cost-optimized, easy-to-manage relational database service.

Amazon SageMaker

AI / ML

AWS brings together widely adopted machine learning (ML) and analytics capabilities.

Amazon Redshift

Analytics

Amazon Redshift uses SQL to analyze structured and semi-structured data across warehouses and lakes.

Google Cloud Platform (GCP)

Google Cloud provides advanced AI/ML tools, a powerful data analytics platform, and efficient global network infrastructure. It supports open-source and containerization, enabling rapid digital transformation and innovation for enterprises.

Gemini

Gen AI

Gemini, a Google DeepMind multimodal model, accepts prompts with images, text, code, and video.

Vertex AI

Gen AI

Vertex AI is a fully managed, unified AI platform for building and using generative AI.

Cloud Storage

Storage

Object storage that's secure, durable, and scalable.

Compute Engine

Compute

Virtual machines running in Google's data center.

Cloud CDN

CDN

Cloud CDN accelerates web applications using Google's global edge network.

BigQuery

Analytics

Data warehouse for business agility and insights.

Google Kubernetes Engine

Containers

Managed environment for running containerized apps.

Cloud SQL

Database

Relational database services for SQL Server, PostgreSQL and MySQL.

Microsoft Azure

Microsoft's Azure offers diverse services for developing, deploying, and managing apps, data, and infrastructure. Leverage existing Windows/SQL Server licenses with software assurance/subscriptions for Azure cost savings.

Azure VM

Compute

Create Linux and Windows virtual machines (VMs) in seconds and reduce costs.

Azure OpenAI

Gen AI

Build cutting-edge, market-ready AI applications with out-of-the-box and customizable APIs/models.

Azure Virtual Desktop

Easily access secure and reliable virtual Windows 10/11 apps desktops and with Azure.

Azure DevOps

Enhance code quality and accelerate your team's productivity using Azure DevOps.

Azure Kubernetes Service

Containers

Simplify Kubernetes, build cloud-native apps, and innovate with AI / open-source.

Azure SQL

Database

Migrate, modernize, and innovate with the modern SQL family of cloud database services.

Azure Arc

Employ Azure Arc to oversee infrastructure across a range of distributed sites.

Azure Local

Azure Arc is a bridge that extends the Azure platform into your environments.

Tencent

Cloud Streaming Services

Official Partner

Tencent Cloud Partner Network
Authorized **Gold**

Tencent's live streaming service is highly competitive, supporting HD, low-latency, interactive, and multi-screen features. It also offers adaptive bitrate, recording, time-shift, and real-time subtitles, ensuring smooth playback and strong market differentiation.

Live Video Broadcasting (LVB)

Live Video Broadcasting

LVB delivers Tencent Cloud live streaming to users, with stable, agile features like playback, distribution, transcoding, and push, ensuring low latency, high quality, and ultra-high performance even under high concurrency.

Bussiness Scenario

Entertainment live streaming,
Game live streaming, E-commerce live streaming

Live Event Broadcasting (LEB)

Live Event Broadcasting

Live Event Broadcasting (LEB) is the ultra-low-latency version of LVB. It features lower latency than traditional streaming protocols and delivers superior playback experience with millisecond latency.

Bussiness Scenario

Sports events,
Online education, Live auctions

Video on Demand (VOD)

Video on Demand

High-quality media services on a one-stop video-on-demand platform, including audio / video production, upload, storage, transcoding, processing, AI, accelerated delivery/playback, and copyright

Bussiness Scenario

Short videos, Video platforms,
Game live streaming, E-commerce live streaming

Tencent EdgeOne

Official Partner

Tencent Cloud Partner Network
Authorized **Gold**

 Tencent Cloud

World-Leading Edge Security and Acceleration Solutions

EdgeOne is a truly integrated edge security and acceleration platform based on a new architecture, offering comprehensive security protection, network and application performance acceleration, leading edge computing, and comprehensive monitoring and operational analysis capabilities to fully meet network security and acceleration needs.

Gaming Industry

Speeds up static resources and optimizes dynamic networks for fast downloads and low-latency gaming, boosting player experience.

Financial Industry

Optimizes dynamic data transfer using global edge nodes and private protocols, minimizing latency and ensuring immediate, stable transactions.

Live Streaming

Supports high concurrency with global edge nodes and intelligent scheduling, ensuring smooth experiences without buffering.

E-commerce & New Retail

Optimizes static content delivery for stable access during peak traffic, enhancing website performance, conversions, and user experience.

Alibaba

Official Partner

Alibaba Cloud has the most data centers in the Asia-Pacific region, providing advanced cloud computing, AI, and big data solutions to support digital transformation. It is particularly strong in e-commerce and finance, offering competitive advantages to various industries.

ESA (Ori. DCDN) HOT Edge Security Acceleration

ESA offers edge acceleration, edge security, and edge computing. With an easy interface, it accelerates and protects websites, applications, and APIs to improve the performance and experience of web application access.

Elastic Compute Service

Alibaba Cloud Elastic Compute Service (ECS) provides fast memory and the latest CPUs to help you to power your cloud applications and achieve faster results with low latency.

OSS (Object Storage Service)

Alibaba Cloud Elastic Compute Service (ECS) provides fast memory and the latest CPUs to help you to power your cloud applications and achieve faster results with low latency.

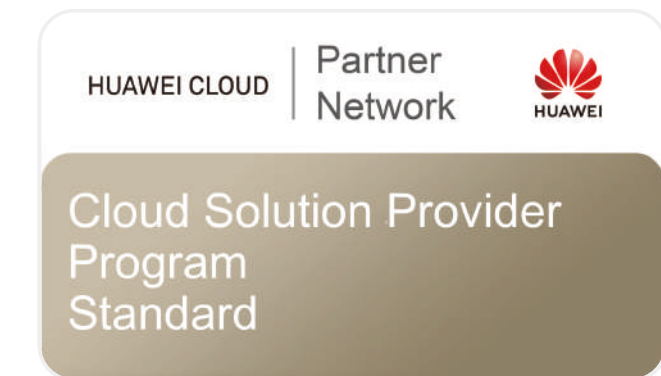

PolarDB

Alibaba Cloud PolarDB is a cloud-native, compute/storage-separated relational database offering high performance, security, and reliability. It auto-scales rapidly, offers large storage capacity, and is highly compatible with MySQL, PostgreSQL, and Oracle syntax.

Huawei

Official Partner

Huawei Cloud leverages Huawei's strengths in 5G, AI, and data centers to deliver high-performance cloud solutions. With strong capabilities in China and a growing international presence, it is ideal for businesses targeting the Chinese market.

Flexus Cloud Service

Introducing a new generation of cloud services tailored for SMBs and developers.

Elastic Cloud Server (ECS)

Virtual cloud servers: reliable, scalable compute for applications.

Object Storage Service (OBS)

Highly scalable, secure, and reliable cloud storage designed for all your unstructured data.

Elastic Load Balance (ELB)

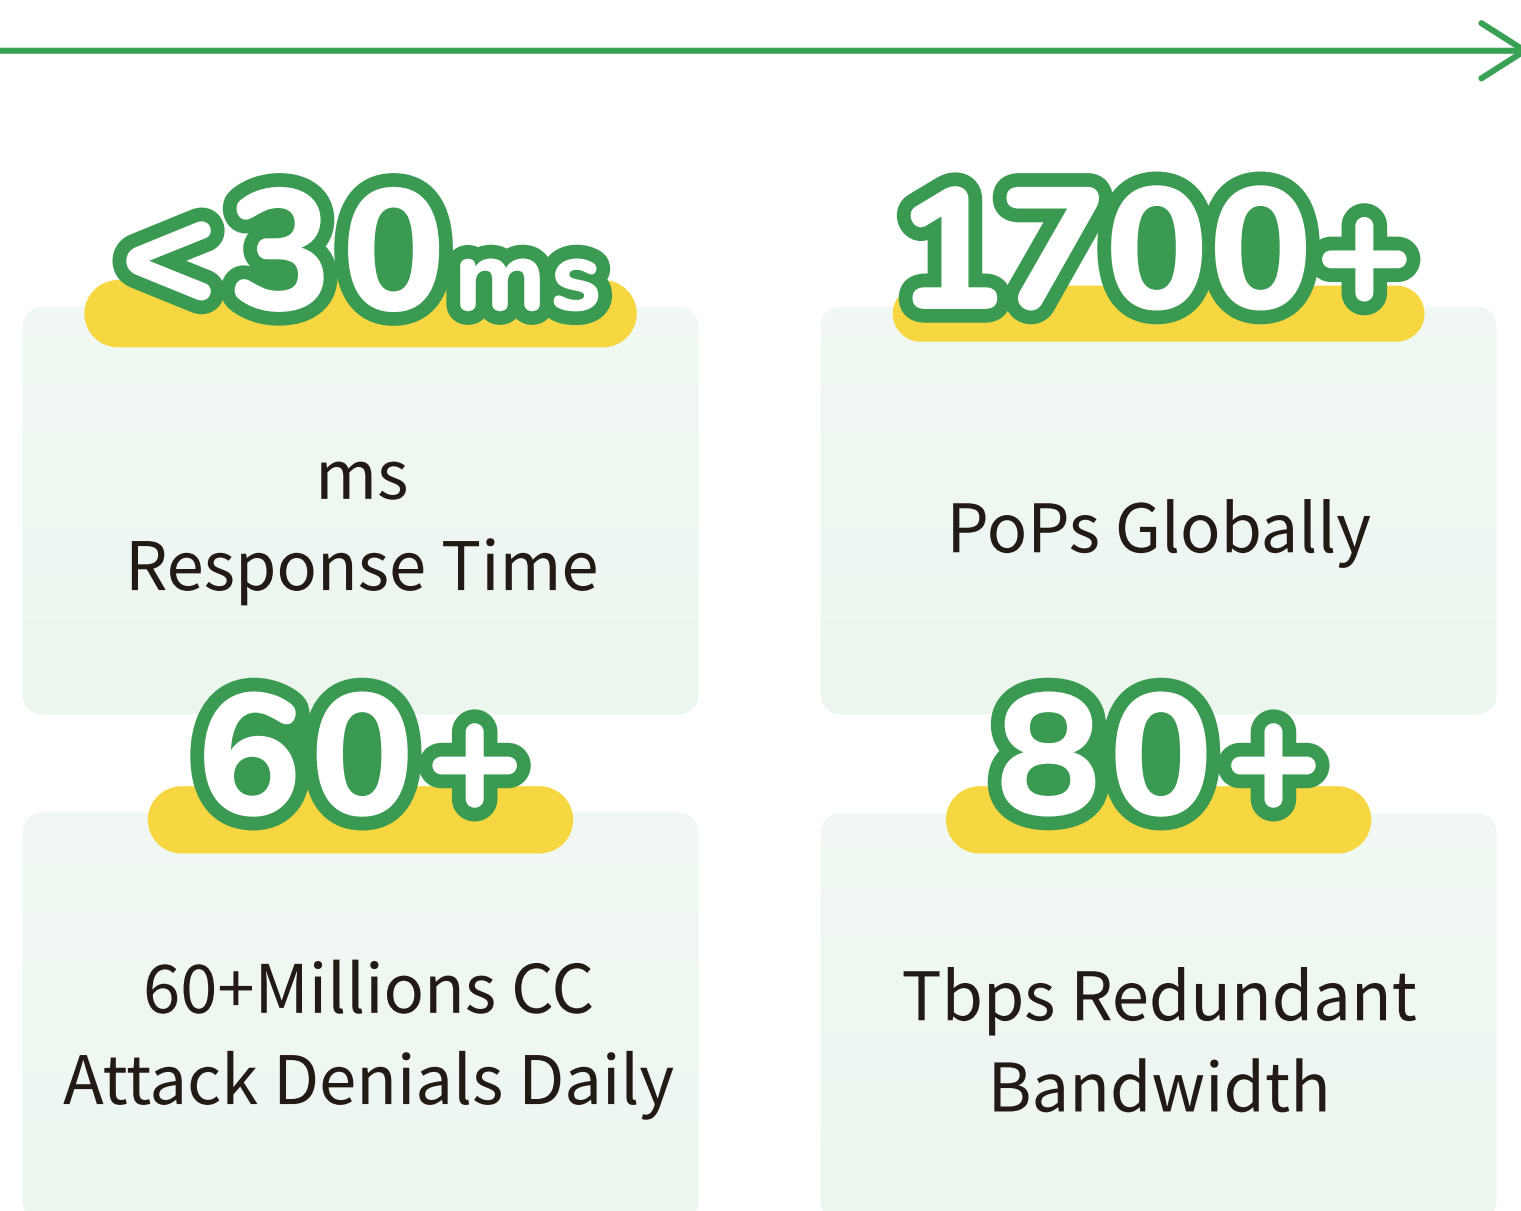

ELB balances server workloads across servers by auto-distributing traffic, improving app service and fault tolerance.

edgenext

EdgeNext is a global edge cloud provider with service coverage in APAC, China, and the Middle East. It offers CDN, streaming, security, and edge computing services to enable faster, more secure delivery and reduce costs and latency.

Reliability, Scalability And Maintainability

CDN & Streaming

CDN & Large File Download

CDN & Large File Download

Accelerate installation files, patches, or any kind of media content download time 10x faster.

Secure CDN Content Delivery Network

Security CDN

A secure content delivery network with both security features and acceleration .

VOD & Live Streaming

VOD & Streaming

Ensure smooth, high-quality playback with minimal lag around the world.

CLOUDFLARE

Smart, secure, fast Cloudflare global network simplifies visibility across on-premises, public cloud, SaaS, and public internet domains, helping businesses regain tech security control.

Connected with all networks, enterprises, and clouds

Cloudflare's application services protect millions of web properties and serve tens of millions of HTTP requests per second on average.

Built-in application services platform intelligence

Cloudflare leverages data from various application and network sources to secure and accelerate web apps and APIs.

Unified and simplified Interface

Simplify security and accelerate performance of your web apps hosted anywhere with Cloudflare's connectivity cloud.

Application security capabilities

DDoS Protection

Protect against DDoS attacks of any size and kind.

Web Application Firewall

Protect business-critical web apps from attacks.

API Shield

Turn global network into your secure API shield.

Web & app performance.

CDN

Ultra-fast static and dynamic content delivery.

Load Balancing

DNS load balancing with active origin health checks.

DNS

Fast, resilient, secure authoritative DNS.

Akamai

Akamai, a top global edge platform handling approx. 30% of internet traffic, with over 350K+ servers across 1300+ networks, offers up to 100% availability SLAs for core services.

API Security

Discover and monitor API behavior to respond to threats and abuse.

Prolexic

Protect your infrastructure from distributed denial-of-service attacks.

IP Accelerator

Boost network performance and security for IP-based applications.

Edge DNS

External authoritative solution for your DNS infrastructure.

Client-Side Protection & Compliance

Assist with PCI compliance and protect against client-side attacks.

App & API Protector

Protect web apps and APIs from DDoS, bots, and OWASP Top 10 exploits.

COCLOUD's Key Advantages

Competitive Pricing

COCLOUD offers lower prices than direct providers, helping clients reduce costs and boost ROI while enjoying high-quality cloud services.

Flexible Payment Options

Supports flexible payments, offering clients convenient and flexible payment methods.

Top Global Presence

With the most locations in Southeast Asia and globally, COCLOUD provides fast, localized support, ensuring high operational efficiency and stability.

Partnerships with 7+ Cloud Providers

Collaborates with leading cloud providers to deliver a flexible, reliable hybrid cloud environment suited for various industries.

COCloud Supports Business Growth
